## Utilities

### cogcheck

Prints which cogs are active and which are free.

Usage:

```
cogcheck
```

### copy

Copies a file.

Usage:

```
copy srcfile dstfile
```

Copies *srcfile* to *dstfile*. If overwriting *dstfile*, will ask for confirmation first.

### del

Deletes files.

Usage:

```
del files [options]
```

Options:

- `/Y` -- delete without asking for confirmation

*files* can contain wildcard characters ("?" and "\*").

### dir

Prints a directory of files.

Usage:

```
dir [files]
```

*files* can contain wildcard characters ("?" and "\*"). If *files* is not specified, it defaults to "\*.\*".

### echo

Prints its arguments.

Usage:

```
echo [arguments]
```

Not particularly useful, just an example of reading arguments from args.d8a.
